

CONTENTS

M. Ioelovich Effect of lattice distortions on crystalline structure of CI	3
M. Ioelovich Study of cellulose interaction with various liquids	10
N.I. Bogdanovich, M.A. Arkhilin, A.A. Menshina, L.N. Kuznetsova, A.V. Kanarskii, V.M. Mukhin, N.L. Voropaeva, V.V. Karpachev Magnetosusceptible adsorbents obtained by thermochemical activation	16
A.A. Revina, N.L.Voropaeva, V.M. Mukhin, L.V. Chekmar, A.I. Konovalova, V.V. Karpachev The effect of iron nanoparticles on physico - chemical properties and functional activity of active carbon from plant materials	24
P. Kudryavtsev Heat-resistant inorganic binders	32
P. Kudryavrsev , O. Figovsky New method for manufacturing membranes by processing thin-film materials with a flow of electrically charged solid particles	38
M. Belloni , T. das Neves Conti The need for changes in electric distribution network for the use of the mini and micro on grid generators	52
V.V. Malanin, O.G. Pensky, A.V. Chernikov, E.N. Ostapenko Construction technology on the basis of artillery guns	59
E.G. Shahbazov, R.A.Yusifov, K.Sh. Jabbarova, Kh.Kh. Huseynli Nanosystem preventing complications in oil and gas production	64
E. L. Tarunin Evolution of the repulsive force of like charged spheres into the attractive force with reduction of distances between the spheres	68
V. Meltser Impinging streams: a new method of interaction gas – particles	78
A. Beylin Technical principles of simultaneous white light and 5-ala-induced fluorescent imaging for real-time microsurgical resection of malignant gliomas	90
LETTERS	
V.A. Etkin Parameters of spatial heterogeneity of non–equilibrium systems	107
NEWS & EVENTS	
Book "Welding of metals: classification, brief history, development" by D. Pogrebisky	113
