

Volume 10, No. 3-4 , 2008

CONTENTS

No.3

O. Figovsky, D. Beilin ,

Building Materials Based on Advanced Polymer Matrix, (Review)

- Introduction
- State of the Art in Polymer Concrete
- Structure of *RubCon*
- Physical-Mechanical Properties of *RubCon*
- Strength of Reinforced *RubCon*
- Creep of *RubCon*
- Chemical and Radiation Resistance of *RubCon*
- Repair and Strengthening of Reinforced Concrete Structures by Polymeric Composition Coatings
- Production of *RubCon* Compositions and Articles
- Application of Polymer Compounds Including with Elastomeric Binders for Monolithic Flooring
- Application and Performance Evaluation of *RubCon*
- References

No.4

Material Engineering and Applied Physics

V.Bolshakov, V. Rossikhin, E. Voronkov, S. Olovytyy , J. Leszczynski,

The Performance of the 6-31G^{##} Basis Set and its Modifications for DFT Calculations of Nuclear Magnetic Shielding and Spin-Spin Coupling Constants

I. Alperovich

Ecological Pure Solar Silicon technology

A. Bayramov, N. Safarov

Organic-Silicon Sensors and Risk Assessment of Organic Nanomaterials

I. Gaissinski, V. Rovenski

Entropy Principle Maximum for Hierarchical Dynamical Systems and the Turbulence Problem

E. Barsky

Evaluation of the Quality of Cascade Separation Processes

Letters to the Editorial Board

V. Dolin

Sustainability of Natural Environment at the Modern Stage of Anthropogenic Transformation of the Biosphere

Yu. Magarshak,

α -Particles and Pauli Principle in Bara Atom Model

Events and Information
